

We connect human expertise **with technical solutions.**

psb intralogistics is one of the leading companies in Europe's intralogistics sector. We design and implement customized integrated systems for the in-house material flow and warehouse automation. From design and production to the life-cycle service, for more than 130 years we have focused on the success of our customers.

We want to strengthen our team with a

Software developer Java (m/f) for our software department

Your responsibilities:

- Conception, implementation and commissioning of software for warehouse management systems (WMS) and material flow systems
- Project-oriented development within Java environment (Vaadin framework) and databases within a team
- Analysis of customer-specific requirements to functions and definition of the technical concept
- Independent implementation of project-related tasks

Your profile:

- University degree in computer science, or comparable related qualification or professional experience
- Programming experience (Java, Vaadin, PL/SQL, T-SQL or Eclipse)
- Experience with databases (Oracle, MS SQL Server) would be a plus
- Structured, target-oriented and independent working in a technical environment
- High degree of team ability
- Good German and English language skills, both written and oral
- Interested in challenges and creativity in developing the optimum solution

We offer interesting, complex tasks in a dynamic, expanding industry. You will be part of a highly qualified team with a flat hierarchy, working in innovative and challenging projects in an international business environment.

A training plan within the framework of our mentor program, performance-based salary, a corporate pension plan plus further benefits for us are a matter of course.

If you are interested in this job position, please send your detailed CV and cover letter to Jochen Hoffmann, Human Resources Manager at psb: personal@psb-gmbh.de
